⁵ Odesa Polytechnic National University, Odessa – Ukraine. Associate Professor of the Department of Physical Education and Sports. Doctor of Philosophy.

The evaluated article is relevant, with clear organization and respect for the sections of the text.

Topics worth paying attention to are as follows:

1. Use of British English: The magazine tends to use American English. It is then up to review;
2. Revision of terms in Portuguese of Brazil, such as *control*, which is written *control* in the Abstract.
3. The methodology is very clear; however, it would be worth mentioning some author of methodological tendencies to situate the literature review.

In short, having raised the above questions, the article was suitable for publication. Therefore, this text is considered as **APPROVED**, with minor changes to be made.
