This article has outstanding relevance and deals with a highly pertinent topic, with an impact on the contemporary educational field. The text is clearly structured and makes a positive chain of ideas, which facilitate understanding.

The points that can be improved are the following:

1. It is appropriate, if possible, to cite the authors who support the methodology used, those authors who theoretically support the *system analysis methodology* and the idea of *synergistic dimension*.
2. The abstract in English and the text are written in British English, but the journal in question uses American English for its texts. Therefore, it is appropriate to change;
3. The abstract in Portuguese is in Portuguese from Portugal, but the journal uses the Portuguese from Brazil. It is therefore appropriate to make this change;

In short, despite these points, which can easily be corrected, it is recommended to publish and indicate the status of the text as **APPROVED**, with minor changes.
