REVIEW FORM

Article title: Pedagogical strategies for mitigating academic deficits in contemporary educational settings

A. COGNITIVE DIMENSION
Sequential and logical sequencing of the content of scientific ideas.
1. Does the article contain original ideas that have not yet been presented on the subject?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
2. Is the topic important to the context in which it is inserted?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
3. Does the introduction make the research topic clear, present the studies that have addressed the problem or similar research and point out the gap that the research covers/justification for the research?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
4. Does the introduction make it clear what the research question is or the hypotheses (if applicable) and are the general and/or specific objectives in line with the research question?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
5. Is the theoretical framework relevant to the topic and in line with the objectives set?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
6. Is the theoretical framework presented in sufficient quantity and quality for the research construct and are the ideas presented in sufficient depth for the study in question?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
7. Does the theoretical framework presented include classic authors in the field who are still relevant to the discussion, and does it also include work from the last five years?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
8. Are the results consistent with the aim of the research, the theoretical framework and the methodology?

<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Partially <input type="checkbox"/> No
9. Is the data calculated correctly and do the results show that there is no fabrication or falsification of data?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
10. Do the discussions correlate coherently with the theoretical framework?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
11. Do the discussions correlate coherently with the results presented?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
12. Do the conclusions provide an answer to the research question and objectives?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
13. Do the conclusions present authorial closure without repeating previous parts of the article and pointing out the limitations of the research itself and future research?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Partially <input type="checkbox"/> No
Reviewer's comments on the cognitive dimension.
-
B. METHODOLOGICAL DIMENSION
Precise description of the methods and techniques used.
1. Does the title specify the content of the work more generally and the subtitle (if there is one) is a technical title more related to the topic? Another possible approach is when the title refers to the theoretical object and the subtitle to the empirical object.
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
2. Does the abstract present the objective, methodology, results and conclusions in a way that is coherent with the work?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
3. Is the choice of keywords in line with the content of the article and the field?
<input type="checkbox"/> Yes <input type="checkbox"/> Partially <input checked="" type="checkbox"/> No
4. Is the objective clearly written?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No

5. Is the methodology detailed, characterized and does it explain how data will be collected (if applicable) and analyzed?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Partially <input type="checkbox"/> No
6. Is the methodology coherent with the theory and consistent with the results?
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Partially <input type="checkbox"/> No
7. If the research involves human beings, have the procedures carried out to comply with research ethics guidelines been described or the approval number of the work by the research ethics committee indicated?
<input type="checkbox"/> Yes <input type="checkbox"/> Partially <input checked="" type="checkbox"/> No
Reviewer's comments on the methodological dimension.
-
C. AESTHETIC DIMENSION
Writing, form and normalization.
1. Are the rules observed with regard to citations (ABNT 10520 - 2023), references (ABNT 6023 - 2018), presentation of illustrations and tables (title and source)?
<input type="checkbox"/> Yes <input type="checkbox"/> Partially <input checked="" type="checkbox"/> No
2. Does the text show correct accentuation and typing of words; nominal and verbal agreement; correct arrangement of words and connection between sentences or paragraphs (cohesion); logical relationship of the ideas presented (coherence); avoid repetition in the text of what is already written in the illustrations and tables?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Partially <input type="checkbox"/> No
3. Are the illustrations (graphs, charts, images, figures, maps) and tables of adequate size and legibility for reading?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> Partially <input type="checkbox"/> No
Reviewer's comments on the aesthetic dimension

The reviews will be published without the identity of the reviewer, in accordance with the principles of Open Science. The reviewer must state whether he/she authorizes the publication of the review with his/her identity or authorizes it without his/her identity.

Once the reviewer agrees to the review, the review will be published without their identity. If the reviewer wishes to authorize their identification, please inform it in response to the review request.

Reviewer's opinion/ Comments

- The work addresses a highly relevant issue in a very complex context that needs to be tackled so that education does not suffer even more in view of the challenges being faced. The approach provides a very interesting analysis of factors that become challenges or opportunities for overcoming major socio-political-structural difficulties. Nevertheless, I believe that, as listed below, there are some issues that need to be addressed before the text is recommended for publication.

That said, I believe that a more authorial development in the conclusions would be interesting. The work is extremely dense and provides a vast analysis of collected data and proposals on how to work in the face of the scenarios presented. In addition to tying all of this together, it is important that the authors appear in the final considerations, making connections and demonstrating their positions on what has been presented, as well as expressing their opinions on what is being concluded in the study. Although it meets the basic criteria for bibliography, there is already an extensive bibliographic framework on the use of ICT in educational issues. Relevant bibliographies could be incorporated, especially in the theoretical review in the text, to reinforce what has been presented, especially since the use of technologies is one of the things considered positive in facing the scenarios.

List of mandatory corrections

- **Reduce the number of keywords to a maximum of 5**
- **Specify more details about the data collection method, whether or not ethical review was required because it involved people and questionnaires, whether it was done anonymously, or what other measures were taken, especially during data collection**

- Expand the conclusions by including not only the summary of what was analyzed, but also the authors' views and opinions on these processes, bringing in the authors' own voice and position in the final consideration

Publication of the opinion, according to Open Science standards

- I authorize publication without the name of the reviewer
- I authorize publication with the name of the reviewer
- I authorize publication with the name of the reviewer, being aware that the journals of Editora Ibero-Americana, it is mandatory to.
